**Test pens and inks
28 - 72 mN/m**

Test inks are fluids, for fast testing of the surface tension of products.

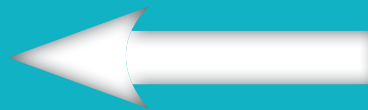

Test inks are available in the range 28 - 72mN/m (non-toxic) in 10 / 30 / 50 / 100 and 1000ml PET bottles. The 10 & 30ml bottles are equipped with a brush inside the lid.

Test pens are available in the ranges 28 - 72mN/m (non-toxic) with a capacity of 10 or 26ml.

The 10ml pens are equipped with a felt tip of 5mm, the 26ml pens with a felt tip of 15, 20 or 60mm.

On request we can offer test pens and inks in the range 16 - 105 mN/m.

< 21 mN/m and > 72 mN/m inks are without color.

Example:
Material: 38mN/m

① 34 mN/m

③ 38 mN/m

② 36 mN/m

④ 40 mN/m

Durability

The durability of the ink depends on the frequency of use of ink or pens.

- With more than once daily use for about 3 months
- For weekly use around 6 months
- For occasional use >12 months (Assuming an immediate closure of the bottle or the pen is immediately after use)

Test pens

Our test pens are available in two different sizes:

- Small pens (KS-series) 10ml
5mm felt tip.
- Big pens (GS-series) 26ml
Standardly with 15mm felt tip
Optional with 20 and 60mm felt tip available.
